

Waipa Catchment Afforestation Feasibility Study

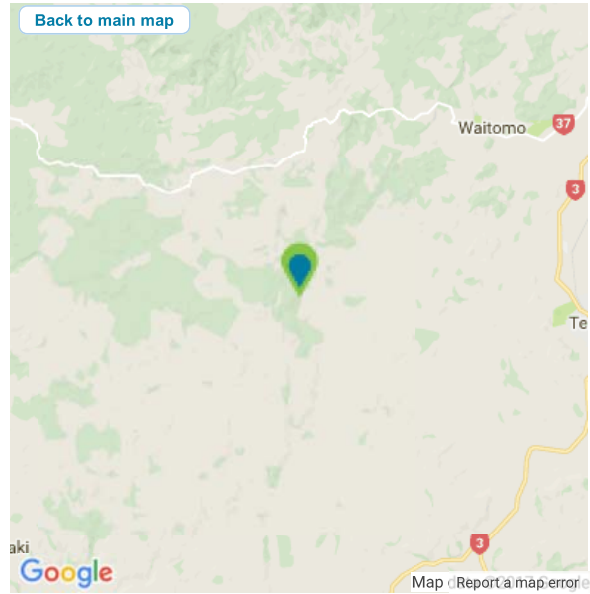

Pete Watt
021 583282

This project will enable farmers in the Waipa Catchment to make better decisions on forestry planting to improve environmental outcomes.

This project will gather information to enable farmers in the Waipa Catchment to make the best environmental decisions around forestry planting for the betterment of the catchment. It is recognised that a current impediment when considering afforestation as an option is the lack of information available to land owners. It is this projects premise that land owners will consider afforestation option if they are provided with information at the property-level that shows the economic viability of afforestation. WRA 15-029.
