Bruce McAuliffe  
Team Leader Water Policy  
Science & Strategy.

Submission.

Dear Bruce,

Evolutionist environmental atheism is temporal  
or only P.C. Isn't it time all in NZ considered "farmer  
dieback" & God's word stating "a poor man's farm  
may have good soil but injustice robs him of its riches."  
Proverb 13 v 23. (The only occupation so mentioned.)

Take the ever increasing costs which a farmer in  
NZ can only retrieve by increasing his stock num-  
bers & environmental damage even further! Of course a  
farmer can always buy his neighbour as has been the ex-  
pansion of a dairy farmer on 20 hectares with a sharemilker  
in 1950, to nearer 200 hectares today! Hence "farmer die  
back." It was a 40 hr week outside farm gates then & same  
today! Truthfully it is dirty economics the problem!

Do we honestly believe our Creator botched ruminants  
making them a threat to climate with carbon, nitrous ox-  
ide urine excesses? What about the 8 billion human  
population?

The "truth" is Socialist Globalist elite with evil  
Politics & Science have stolen the opportunity to harness  
the World & its endless devastating problems, via a New  
World Order, they are no different from Hitler or Stalin's  
Communism.

Many Nations are going along with United Nations  
for a NWO but not President Donald Trump hence  
his defamation.

Sincerely,

T G Brown.
