TRADE COMPETITION AND ADVERSE EFFECTS (select appropriate)				
☐ I could / ☑ could not gain an advantage in trade competition through this submission.				
am /   am not directly affected by an effect of the subject matter of the submission that:  (a) adversely effects the environment, and				
(b) does not relate to the trade competition or the effects of trade competition.				

Delete entire paragraph if you could not gain an advantage in trade competition through this submission.

2	THE SPECIFIC PROVISIONS OF PROPOSED PLAN CHANGE 1 THAT MY SUBMISSION RELATES TO Please state the provision, map or page number e.g. Objective 4 or Rule 3.11.5.1 (continue on separate sheet(s) if necessary.)
	I SUPPORT OR OPPOSE THE ABOVE PROVISION/S (select as appropriate and continue on separate sheet(s) if necessary.)
	Support the above provisions
	Support the above provision with amendments
	Oppose the above provisions
1	MY SUBMISSION IS THAT  Jell us the reasons why you support or oppose or wish to have the specific provisions amended.
•	(Please continue on separate sheet(s) if necessary.)
ļ	
	I SEEK THE FOLLOWING DECISION BY COUNCIL (select as appropriate and continue on separate sheet(s) if necessary.)
	Accept the above provision
	Accept the above provision with amendments as outlined below
	Decline the above provision
	If not declined, then amend the above provision as outlined below
	Amend as follows:

Doc#9150077 Page 2

## Additional sheet to assist in making a submission

Section number of the Plan Change	Support /Oppose	Submission	Decision sought
Please refer to title and page numbers used in the plan change document	indicate whether you support or oppose the provision.	State in summary the nature of your submission and the reasons for it.	State clearly the decision and/or suggested changes you want Council to make on the provision.
Chapter 3.11: Area Covered by Chapter 3	Oppose	Oppose the progression of a PC1 without a comprehensive whole of catchment planning response.	Withdraw PC1in its entirety to allow for consultation with Hauraki iwi before any further Proposed Plan Change.
			Re-notify PC1 with the inclusion of the withdrawn area relating to Hauraki iwi so that the catchment can be considered in entirety and so submissions and evidence can be coordinated for the whole of the catchment.
Chapter 3.11:  ckground and Explanation	Oppose	The plan would be improved by adding an issue statement to address particular issues for the horticultural sector.	Provide some opportunity for commercial vegetable production on new sites in the Waikato River catchment, to preserve the productive capacity of the vegetable sector; particularly in relation to the production of non-substitutable leafy greens, potatoes and carrots for domestic consumption in key periods of the national domestic foodchain.
			Ensure the plan provides for the establishment of an alternative method or model to establish a benchmark nitrogen and phosphorus discharge for commercial vegetable production systems from OVERSEER.
~~.			The plan should make an explicit statement to recognise permanent fruit production as a low intensity farming activity.
3.11.1: Values And Uses For The Waikato And Waipa Rivers	Support	Support the identification of Primary Production as a Mana Tangata value of water arising from its use by people for economic, social, and cultural purposes.	Retain Primary Production as a Mana Tangata value.
Objective 2		Maintaining social, economic and	Retain as proposed.
Social, economic and cultural wellbeing is maintained in the long term	Support	cultural welling must be a cornerstone objective in PC1.	netaiit as proposeu.
Objective 3  Short-term improvements in water quality in the first stage of restoration and protection of water	Support in part	It is agreed that a 10% reduction should be sought overall but targeted reductions required for vegetable growing should be fair.	Amend the plan to provide flexibility to land managers seeking to achieve reductions collaboratively at a catchment or subcatchment scale.

quality for each sub- catchment and Freshwater Management Unit Objective 4  People and community resilience  Policy 1: Manage diffuse discharges of nitrogen, phosphorus, sediment and microbial pathogens	Support in part  Support	Support the recognition and enablement of low intensity farming systems. This is particularly important for the fruit production sector which has a low environmental risk that should be entitled to expand without excessive limitations through the ten-	Amend the objective to recognise that this plan change is transitional, to provide time to develop the tools required to more efficiently allocate responsibility for achieving contaminant reduction targets in the long-term.  Retain as proposed
Policy 2: Tailored approach to reducing diffuse discharges from ming activities/	Support in part/Oppose in part	year transitional period.  Support a policy platform that provides for a Farm Environment Plan approach established by resource consent or certified industry schemes.  There should be alternatives to the nitrogen reference point during the transitional period given the limitations of OVERSEER for modelling horticultural systems.  The policy should enable a consenting pathway for groups that form to take responsibility for contaminant reductions by implementing a combination of catchment and paddock scale mitigations that are able to be measured and reported	Amend policy to provide alternatives to the nitrogen reference point during the transitional period given the limitations of OVERSEER for modelling horticultural systems.  Amend policy to enable a consenting pathway for groups that form to take responsibility for contaminant reductions by implementing a combination of catchment and paddock scale mitigations that are able to be measured and reported
Policy 3: Tailored approach to reducing diffuse discharges from commercial vegetable production systems	Support in part	<ul> <li>Supports a policy platform that provides for:</li> <li>The essential aspects of the vegetable production industry in the Waikato.</li> <li>Targeted reductions required for vegetable growing that are fair given the impact of the sector on water quality and the likely cost to the community of achieving the targets.</li> <li>Protects existing production as a priority over any new production that is likely to have a greater contribution of discharges.</li> <li>Protects the concept of an authorised farm enterprise through a capped area controlled activity consent, that allows for rotation across new and existing land parcels.</li> <li>Enables opportunities for new vegetable production through a new restricted discretionary rule if the proposed operation can</li> </ul>	Retain policy approach subject to consequential amendments to other policies and methods to give effect to the relief sought.

		demonstrate a decrease in discharges compared to the	
		activity it is replacing. Those	
		discharges should be assessed across all four contaminants as	
		covered by the plan change.	
	Ì	Ensures the proposed farm	
		planning framework is practical	
Policy 4: Enabling	Support	and achievable for growers.  Supports a policy platform that	Retain as proposed.
activities with lower		enables existing and new low	
discharges to continue		discharging activities to continue	
or to be established while signalling further		while recognising that low dischargers may in the future need to take	
change may be		mitigation actions to reduce	
required in future		contaminants.	
Policy 5: Staged	Support	Support staged approach to	Retain staged approach as proposed.
approach		implementing the Vision and Strategy.	Make consequential amendments to
			other policies and methods to give effect to the relief sought.
Policy 6: Restricting	Oppose	Support policy pathway that supports	Provide a restricted discretionary activity
nd use change		a clear consent path for the approval	for operations capable of demonstrating
		of land use applications that can demonstrate clear and enduring	clear and enduring decreases in existing diffuse discharges.
		decreases in existing diffuse	amase district gest
		discharges.	
		Do not not agree however that	
		operations capable of demonstrating	
		clear and enduring decreases in	
		existing diffuse discharges should be	
		required to undertake an application for a non complying activity resource	
		consent. They should be provided for	
		as a restricted discretionary activity.	
Policy 7: Preparing for allocation in the future	Support in part	The proposed plan change is not allocating discharge rights. The ten -	Amend the principles in Policy 7 to recognise the polluter pays concept.
anocation in the fatale	part	year timeframe to develop tools and	recognise the polluter pays concept.
		methods for property level allocation	
Jan.		is required and must be supported by information gathering and research to	
		information gathering and research to inform future allocation.	
		The principles for any future allocation should recognise the	
		polluter pays concept.	
Policy 8: Prioritised	Support in	Grower operations do not neatly fit	Retain as proposed, but add to this policy
implementation	part	into subcatchments. Rotations are	or another if more appropriate an
		likely to vary across subcatchments on a yearly basis. This variance is	enabling policy that allows for the management of horticultural enterprises
		unlikely to be large but in our view	between subcatchments.
		the management of enterprises	
		across a number of subcatchments should be enabled given the scarcity	
		of the land resource available for	
		commercial vegetable cropping and	
		the difficulty of managing multiple	;
		consents the discharges across each subcatchments and balancing within	
		the current capped area for each	
		subcatchment referred to in the	
		consents.	

Policy 9: Sub- catchment (including edge of field) mitigation planning, co- ordination and funding	Oppose	There is no provision in the plan to offset the effects of diffuse discharges by providing mitigations beyond the farm boundary	Proposed Policy 3.11 3 9 should be modified to provide for offsetting where it can be demonstrated there will be a commensurate effect on the restoration of the health and well-being of the Waikato River.  The policy should enable a consenting pathway for groups that form to take responsibility for contaminant reductions by implementing a combination of catchment and paddock scale mitigations that are able to be measured and reported
Policy 11: Application	Support in	Support offsetting policy and	Amend the policy and method to extend
of Best Practicable	part	methods as a practical tool for	to non-point source discharges where the
Option and mitigation		mitigating the effects of discharges	same environmental outcomes can be
or offset of effects to		within a catchment.	achieved.
