Submission.

The Waikato river is one of cleanest in the world. Every river will always go brown when it floods or rain but soon. Flushes itself clean.

The Waikato regional council should look at other NZ rivers. EG! Avon river in CHCH with wild ducks polluting it is one of the dirtiest.

The Manawatu river, which is feed raw sewage. Auckland is feeding over millions of cubs of raw sewage into its harbours. "What a Joke"

The Waikato river does have pollution, coming from Hamilton city EG. Fuel + oil spills, animal and Pet [redacted] and when the Hamilton Sewage Farm overthrows.

There's also other pollution coming from Taupiri mountain cementie, with [redacted] leaching into the river, You can see and smell it where Mangawara and Koma Korau. streams merge with Waikato river.

Why isn't the [redacted] regional council attack these probalurns and stop ~~attacking~~ attacking Farmers. The reasons they are not is because they are [redacted] and Hamilton city is in the to hard basket.

I firmly believe theres more [redacted]

[redacted]

[redacted]

[redacted]

I ~~wish~~ wish to be herd, in person
